**2021 Annual Notification of Asbestos Containing Materials**

In compliance with the US Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA), an inspection for asbestos-containing building materials was completed in 2010. The inspection findings and asbestos management plans have been on file in the school administrative office since that time.

The EPA requires re-inspections of the asbestos materials every three years. An accredited Inspector/Management Planner performed the re-inspection of the building on 5/4/2010 and issued a report regarding the results. There were no significant changes in condition of the remaining asbestos. All asbestos containing materials in the school are in good condition and will continue to be managed as recommended by the accredited Management Planner.

The results of the re-inspection and the 6 Month Surveillance are on file in the Management Plan in the school's administrative office and are available for public viewing. Rene' Jenniges, the Asbestos Program Manager, is available to answer any questions you may have about asbestos in the building at 507-342-5389.

**2021 Annual Pesticide Notice**

Effective in 2000, MN state law requires schools to notify stakeholders of pesticide applications on school property. This notification will include an estimated schedule of pesticide applications which is available for public viewing at the school office. If any individual wishes to be notified of a pesticide application made on days other than those specified in the schedule, please contact the school office at 507-342-5389.
