

Cartridge Dust Collector Specifications

The Beltech Engineering cartridge dust collectors are space efficient, and low maintenance, manufactured to your exact specifications. This design, unlike traditional designs, moves the incoming particulate air stream perpendicular filters and the falling dust assisting the clean process. The result is a more effective and extended cartridge life and effective filter cleaning.

Designed to save time and money!

Beltech Crossflo are designed for easy maintenance. All our units are front access design and the filter release is a tool-free clamping channel.
