CARE | USE | CLEANING

Cleaning and lubricating the **Enviro-Vac™** is **VITAL** to the continuous operation and performance of this tool. **Dirt build-up will occur** inside the vacuum trumpet cover which will affect its performance. Failure to do so will render this tool **inoperable**.

Cleaning the **Enviro-Vac™ Attachments, Inner Cone Trumpet, and Inner Orbiting Beater Tube** when they show dirt, especially after cleaning a dirty vehicle is **highly recommended** once you have finished using this tool and **BEFORE IT IS PUT AWAY!** When there is visible dirt build-up inside the **Inner Cone Trumpet** and on the **Inner Orbiting Beater Tube** - the **Enviro-Vac™ NEEDS CLEANING!**

STEPS FOR PROPER CARE | USE | CLEANING

1

Frequently during application and upon visual dirt build-up inside the Inner Cone Trumpet and on the Orbiting Beater Tube.

To clean the **Inner Cone Trumpet** and **Orbiting Beater Tube** submerge the **Enviro-Vac™** end in a pail of light sudsy water while engaging the **Enviro-Vac™** for 20~30 seconds. Using a clean towel wipe dry the **Outer Attachment** and **Inner Cone Trumpet**. The **Enviro-Vac™** now ready to be re-used.

2

End of day procedure prior to storing the device

- When finished using the **Enviro-Vac™** and prior to putting it away until its next use, remove the **Outer Casing Attachment** to expose the **Inner Cone Trumpet**. Unscrew the **Inner Cone Trumpet** to expose the **Inner Orbiting Beater Tube**.
- To Clean, place the **Outer Casing Attachment**, the **Inner Cone Trumpet** and **Inner Orbiting Beater Tube** in a pail of light sudsy water and clean all the parts using a wet cloth and agitation.
- Using a dry cloth wipe dry the **Outer Casing Attachment**, the **Inner Cone Trumpet**, and **Inner Orbiting Beater Tube**.
- Using a fine oil such as **WD-40** or **3 IN 1** oil, lubricate the entire **Inner Orbiting Beater Tube** until it is well lubricated then re-assemble the **Inner Cone Trumpet** to the **Enviro-Vac™**. The **Enviro-Vac™** is now cleaned and ready to be put away for its next use.

BE EXTREMELY CAREFUL when re-threading the Inner Cone Trumpet as it has plastic threads and can easily become cross threaded. Carefully start threading the Inner Cone Trumpet onto the gun thread without cross threading.

When attaching the Inner Cone Trumpet to the Inner Orbiting Beater Tube should it start to cross thread do not continue threading, start over to ensure it is threaded properly. Excessive force will damage the threads and will render the Inner Cone Trumpet inoperable!
