

# How to Clean & Disinfect USING THE ENVIRONIZE GAC AUTO TOOLS

CLEAN FIRST AND THEN →		DISINFECT
<p>EnviroVac™</p> 	<p>EnviroFoamer™</p> 	<p>EnviroNizer™</p> 

## Carpet, Upholstery Cleaning and Disinfection

1. To start the cleaning process, use the **Enviro-Vac™** to remove any loose dirt and debris prior to using the **Enviro-Foamer™**.
2. With the carpet and or upholstery now free of debris and loose dirt, just add 50 ml of **Carpet and Upholstery Shampoo** concentrate, 750 ml of **EnviroNize® Catholyte** degreaser detergent and 200 ml of **EnviroNize® Anolyte** disinfection protection into the 1000 ml reservoir and turn on the **Enviro-Foamer™**. The **Enviro-Foamer™** goes right into action providing a deep foaming cleansing solution deep down into the carpet roots where bacteria and dirt thrive.
3. Once the carpet and or upholstery has been shampooed and or cleaned, using the **EnviroNizer™** with the solution dial turned off, turn on the **EnviroNizer™**. With the trumpet end with beater bar pressed into the carpet pile or upholstery go over the area that was recently shampooed. Immediately the **EnviroNizer™ will begin to extract the dirt brought to the surface** by the foaming cleansing solution leaving the carpet and or upholstery that was shampooed not only cleaned but left with a semi-dry condition that will air dry to complete the process.

## Interior Disinfection

Fully fill the 1000 ml **EnviroNizer™** reservoir with **EnviroNize® Disinfectant** solution. Turn it on. Instantly the **EnviroNizer™** will begin to provide a fine mist of disinfectant. Using **EnviroNizer™** deploy the disinfectant solution throughout the vehicle to ensure adequate disinfectant coverage. The **EnviroNizer™** is used primarily as a quick and final disinfection process after the cleaning process has been completed. The **EnviroNizer™** requires an auto shop sized air compressor!

## Disinfecting Key Touch Areas

**Door Handles | Turn Signals | Seat Belt Fasteners | Electrical Equipment and Control Areas | Gear Shift Child Seats | Gas Caps**

Using a fine mist trigger sprayer, mist each area first with **EnviroNize® Catholyte**, wipe after 3 minutes, then reapply to the same areas using **EnviroNize® Anolyte** and wipe after 5-8 minutes.

# How to Mix Solutions and Cleaning the GAC Tools to Maximize Results

## Enviro-Foamer™ Exterior Wash and Waxing

Add 100 ml of **Exterior Wash and Wax Shampoo** concentrate, 200 ml of **EnviroNize® Catholyte** and 700 ml of tap water into the 1000 ml reservoir. Turn it on. Instantly the **Enviro-Foamer™** turns the solution into a super thick, long-lasting **FROTHY, RICH FOAM** that has amazing cling. Rinse the exterior with water as the final process.

## Enviro-Foamer™ Wheels and Tires

Wheels and Tires are no problem for the **Enviro-Foamer™** just add 100 ml of **Wheel and Tire Shampoo** concentrate, 200 ml of **EnviroNize® Catholyte** and 700 ml of tap water into the 1000 ml reservoir. Deploy the **Enviro-Foamer™** to the wheels and tires with a rich foam lather solution. Allow the solution to remain on the surface for 2-3 minutes, then agitate with a nylon brush or non-abrasive scour pad to deep clean, then rinse with tap water to complete the cleaning process.

## Enviro-Foamer™ Upholstery Cleaning and Disinfection

To start the cleaning process use the **Enviro-Vac™** to remove any loose dirt and debris prior to using the **Enviro-Foamer™**. With the carpet and or upholstery now free of debris and loose dirt, just add 50 ml of **Carpet and Upholstery Shampoo** concentrate, 750 ml of **EnviroNize® Catholyte** degreaser detergent and 200 ml of **EnviroNize® Anolyte** disinfection protection into the 1000 ml reservoir and turn on the **Enviro-Foamer™**. The **Enviro-Foamer™** goes right into action providing a deep foaming cleansing solution deep down into the carpet roots where bacteria and dirt thrive. Once the carpet and or upholstery has been shampooed, using the **EnviroNizer™** with the solution dial turned off, turn on the **EnviroNizer™**. With the trumpet end with beater bar pressed into the carpet pile or upholstery go over the area that was recently shampooed. Immediately the **EnviroNizer™** will begin to extract the dirt brought to the surface by the foaming cleansing solution leaving the carpet and or upholstery that was shampooed not only cleaned but left with a semi-dry condition that will air dry to complete the process.

## EnviroNizer™ Cleaning

During the Carpet, Upholstery Cleaning and Disinfection process it will be important to have a 2~3-gallon pail within reach filled with warm tap water. While the **EnviroNizer™** is being deployed in extracting the dirt from the carpet, the trumpet end will begin to fill with the dirt which has been removed. The **EnviroNizer™** will periodically require cleaning to remove the dirt and debris. While the **EnviroNizer™** is being deployed submerge the trumpet end into the warm pail of water for 30 seconds to clean. Remove the **EnviroNizer™** from the pail and re-deploy it to continue with the final extraction and cleaning process. Repeat this step as often as necessary to keep the trumpet clean of dirt and debris while the extraction process is on-going. The cleaning pail may have to be replaced with fresh clean warm water should it become too dirty from the **EnviroNizer™** cleaning process.

**\*This air-driven foam gun requires an auto shop sized air compressor!**
