

WILLIAM B JASPER

I got into the school board race to help answer:

1. What do we do about a **new high school**?
2. How do we improve **learning results and lower our costs**?
3. How do we observe **parental rights**?
4. How do we avoid a forced **merger other school districts**?

These are **uncertain times**. We cannot afford the high cost of the proposed high school, nor the debt required to pay for it and the risk that, once started, the project may not be completed. Further, there could be indirect human and property loss costs as the site is unsafe for occupants, commuters and 25 downhill residents. We have a lower cost, lower risk option at the existing site. I support a **public debate and referendum to decide which option is best for the school district**.

As respects **learning**, I wonder if we might be failing to prepare our graduates to live independently, think critically and compete with their global peers. I also wonder about our cost structure which, seemingly, is high relative to our own peers. It is my intent to dig into both issues and advocate for change, as needed.

I am an ardent supporter of **parental rights**, including school choice. **Quaker Valley needs to compete to be the first choice**. I see parents acting like a team leader, approving educational content and resources provided, especially in the early years.

We are facing some unique legal and financial pressures requiring us to be proactive, take cost out of our operations and keep our debt in check. Otherwise, we could be at risk of losing our independence.

Please check out my website for a more extensive review of issues and solutions. Also, information about my qualifications to serve as a School Director. If you support my candidacy, please share my website with friends and neighbors. On social media. Everywhere. Do your part so **"WE CAN DO BETTER."** Thank-you.
