OPIOID COMMUNITY CONNECT

United in the War against Addiction

PUBLIC HEALTH SERVICE TO
INCREASE PUBLIC AWARENESS
AND COMMUNITY DIALOGUE

Dr. Tim Kelly will introduce the science behind how the reward center of your brain can be negatively affected, increasing your risk to have addictive behaviors before ever being exposed to addictive substances or an experience. He will share how the reward center can be positively influenced in a non-pharmaceutical way. While providing action steps to help you or your loved ones' reward center from turning to addictive behaviors.

Updates on Legislative proposals to increase access to drug-free, non-pharmaceutical way for those in pain

Community Forum on how to tackle this epidemic to follow.

Creating a greater understanding and access to resources that prevent addiction before it starts.
