

PATIENT ASSISTANCE PROGRAM

Provision of Free Prescription Medications

The Dispensary Program enables Victory patients to receive all or most of their medications at no charge. Due to the arduous process of enrollment into the pharmaceutical companies' patient assistance programs, Victory staff and volunteers enroll Victory patients into these programs on their behalf. Victory continues to provide medication and laboratory work for patients who are positive for Hepatitis C. The 150 patients who have completed the treatment have all been cured of their Hepatitis C. The cost of the medication and treatment is over \$70,000 per patient. The patients receiving this care have no cost for their medication. In total for 2021, Victory provided

over \$60 million worth of free medication to patients through our Medication Assistance Program. This is significant as 1 in 4 uninsured adults could not afford filling a drug prescription this past year and the same proportion went without recommended tests or treatment due to cost.

Victory orders medication from over 25 pharmaceutical companies' patient assistance programs. The companies below highlight the programs that Victory has been able to secure the highest volume of medications for our patients.
