

EMPLOYER RESOURCE PACKET

Healthy Employees Are Our Best Asset

Employee Health: A Vital Factor For Workplace Productivity

We understand that not all companies can provide health insurance coverage, and not every employee can manage the cost of the health insurance offered by their company. Additionally, some employees may not meet the eligibility criteria for their company's coverage.

Furthermore, it's well recognized that the well-being of your workforce significantly impacts your company's overall financial performance. Health encompasses not just physical fitness but also mental and social well-being. Healthy employees are likelier to feel good and perform at their best, setting a positive example for their colleagues. To foster employee well-being, one practical approach is to introduce health initiatives.

As a component of your company's health initiative, Victory Health Partners is extending its resources to employees and their family members who lack health insurance. The Employer Resource includes a poster suitable for display in your time clock or break room area and an informational card for employees. These materials can be integrated into your employee onboarding process and accessible to current staff members. Once your employees reach out to our New Patient Coordinator at 251.445.0038 to initiate becoming a Victory patient, they will gain entry to a wide range of compassionate, affordable, and comprehensive healthcare services. These resources are available for download at victoryhealth.org/partner-resources. If you have any questions, please don't hesitate to contact us.
