Tally Solutions (Pty) Ltd is a systems integrator in the electronic solutions arena, established in 2012. Our dynamic offerings encompass a comprehensive range of design, supply, implementation, and upkeep of services that elevate communication, supercharge efficiency, and fortify the security of your valuable people, premises and high value assets.

With an impressive track record of successful project completions throughout Africa, we prove our mettle in handling and delivering impeccable results, even in the most demanding conditions. Our esteemed client portfolio spans diverse verticals in both corporate and government sectors, including education, student housing, hospitality, finance, health, retail, and manufacturing.

Embracing the challenge, we take immense pride in our work and continually strive for excellence in every endeavor. Some of our recent notable projects include the prestigious University of Pretoria project, where we manage the data infrastructure network, including seamless Wi-Fi connectivity. Another milestone accomplishment includes our outstanding contributions to the Oceans Mall in Durban, featuring the remarkable Radisson Hotel, where we successfully delivered a comprehensive integrated suite of electronic services across the Mall and the Hotel.

Continental Project Footprint

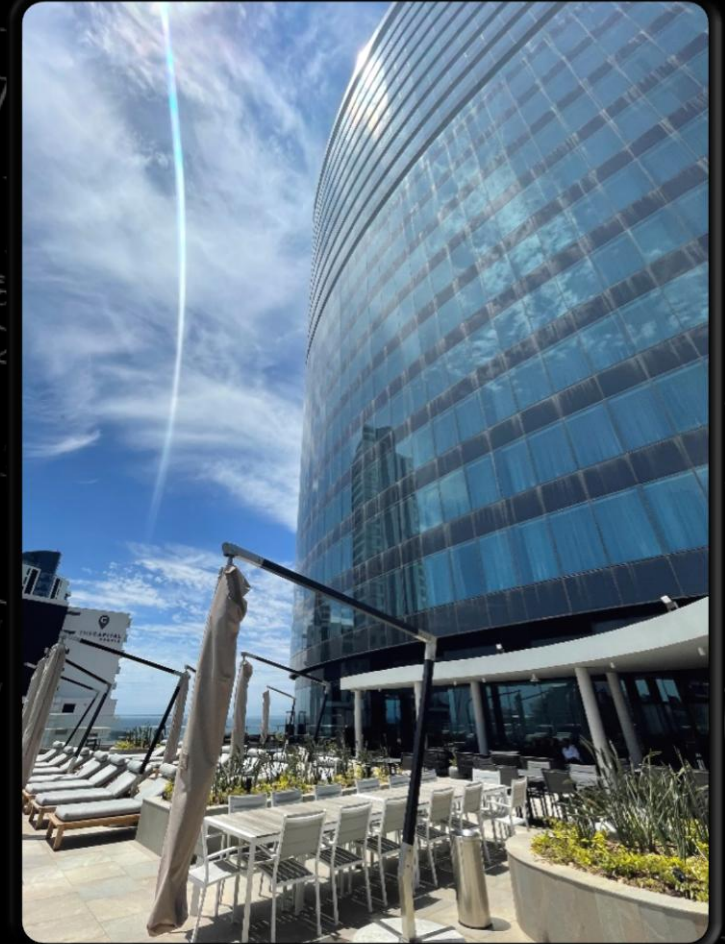

Our track record of successfully completing projects throughout Africa attests to our capability to handle and deliver results even in challenging conditions.

Typical solutions include:

- Structured Cabling for Admin & Guest Network

Smart Malls – Customer-Centric Intelligence

We assist retail owners in building a loyal customer base by utilizing their current Wi-Fi infrastructure or enhancing it to provide a more enjoyable Wi-Fi experience. By implementing a captive portal on the network, customers can engage with it, enabling retail owners to collect valuable data on their shopping habits.

Armed with our engagement platform we can assist retail owners understand the consumer better therefore benefitting the mall tenants. Data is presented through a user-friendly dashboard that offers detailed analytics and engagement tools like vouchering, reward for participation, rich media content and first party data making it easy for retail owners to enhance their strategies.

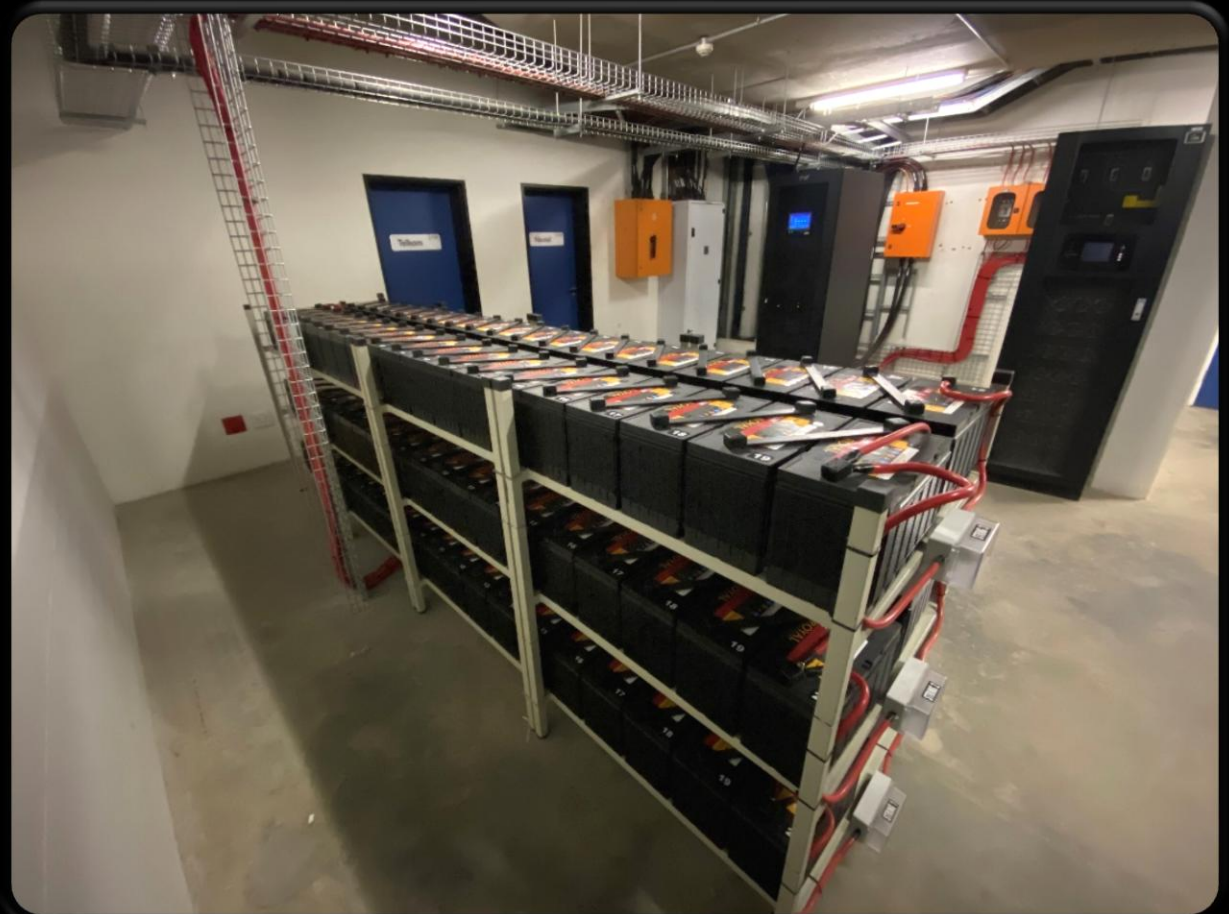

Backup Power & Renewable Systems
