DOGECOIN

DogeCoin is a well-known cryptocurrency and has gained significant popularity. It is positioned in the top 5 cryptocurrencies.

Dogecoin was created in 2013 by software engineers Billy Markus and Jackson Palmer as a fun and friendly alternative to Bitcoin.

The screenshot shows the CNBC TV18 website interface. The top navigation bar includes categories like Market, Personal Finance, Business, Economy, Featured, NextGen, and Engage. A search bar and a 'LIVE TV' indicator are also present. Below the navigation, there are several news teasers with 'NEW' tags. The main content area features a large article titled 'Dogecoin ranks among world's top 5 cryptos, overall value beats blue-chip companies'. The article text states: 'Dogecoin now ranks among the top five most valuable cryptocurrencies in the world with an overall value of over \$50 billion, thanks to last week's 400 percent market rally, according to CoinMarketCap.com data.' To the right of the article is an advertisement for 'Buy PRO @ ₹99' with a 'GET PRO NOW' button. Below the advertisement is a 'CNBC-TV18 Select' section with a '#SmartManufacturingSummit' hashtag.

Tesla CEO, Elon Musk, a prominent investor and promoter of Dogecoin, often influences the value and perception of the currency through his tweets.

Lots of people I talked to on the production lines at Tesla or building rockets at SpaceX own Doge. They aren't financial experts or Silicon Valley technologists. That's why I decided to support Doge – it felt like the people's crypto.
