

Mediana A16 AED

Feature Overview

Key Readiness Features & Device Functions

The Mediana HeartOn A16 is built to help support effective emergency response when sudden cardiac arrest occurs. Intuitive to use and ready when it matters most.

Core Features

-  Semi-automatic operation
-  Adult/Child mode button
-  Dual-use adult/child pads
-  Voice prompts and CPR metronome
-  Visual readiness indicator
-  Automated self-tests
-  47 language options (3 pre-installed)
-  Voice recording

Feature Highlights

Rapid Shock Sequence

ECG analysis and charging performed simultaneously to shorten time to shock.

Pad Quality Check

Device monitors pad status and alerts for issues.

Pacer Pulse Detection

Supports accurate ECG analysis when pacing pulses are present.

Connectivity & Storage

MicroSD card support and IR port.

Practical Design

Clear visual icons, step-by-step voice guidance, adult/pediatric mode switching, and automated readiness features work together to help ensure the AED is ready for real-world use in a variety of environments.
