

# XENOPHON COLLEGE LONDON

School of Psychology

**XENOPHON**  
COLLEGE LONDON

UNIVERSITY OF  
**CHICHESTER**

ACADEMIC PARTNER

## FLEXIBLE LEARNING

You can choose between 2 modes of delivery when enrolling, thanks to our **Flexible Learning** which offers a variety of different learning opportunities to suit your needs, commitments, lifestyle and learning style.

**Distance learning**, giving you the flexibility to fit your study around your personal and work commitments, perfect for a busy lifestyle or when learning on campus is not an option, yet you still want the real-time experience. Study and learn through live online lectures, live webinars, as well as guided independent study delivered via our learning platform. You'll also have access to all the services including the library, student support services and IT.

**A hybrid** mix of distance learning where you can study and learn through live online lectures, webinars and resources to enhance and facilitate study, as well as a period attended in person in the UK\*\* combining the best of both worlds and the flexibility of distance learning to achieve a study/life balance.

\*\* Subject to visa status and requirements.

---

## YOUR LEARNING ENVIRONMENT

**Our virtual learning platform will be a fundamental part of your studies.**

From learning material to virtual classes to attend you will find everything you need to learn.

Follow live lessons, interact with peers and professors, and submit coursework all in one place.

Available at your fingertips, whenever you want, wherever you are.

We partnered with Kaltura (leading Education Video Platform) to provide accessible content for all, including captions, screen reader support and accessible controls which enhance engagement and overall the learning experience for those with learning disabilities.

## WHAT YOU WILL LEARN

The course modules cover the main areas of Psychology, from neuroscience to social psychology and quantitative methods, in order to provide students with solid knowledge and experience.

During your studies, you will:

- ✓ **Learn psychological theories, practices and values,** which will help to understand the human mind, brain and behaviour
- ✓ **Analyse current psychological issues,** and the application of the latest empirical research
- ✓ **Learn in a stimulating and engaging environment,** to promote self employability, reflectiveness and self-awareness, through a problem-solving approach.

Our **MSc-conversion course in Psychology** designed to prepare and upgrade students with a bachelor's degree in Psychology-related disciplines (e.g. BSc in Biology, Social Sciences, Sociology).

Students will build their university experience through a set of soft and hard skills for a successful career in academic, clinical or industry-based contexts.

Our academic network and teaching methodology are based on a practical approach, providing valuable employability skills.

- 
- ✓ The assessment strategy includes individual and group projects and presentations, essays and literature reviews.
-

The student will have the opportunity to study and critically analyse fundamental aspects of Psychology, including:

- **CONCEPTUAL AND HISTORICAL PERSPECTIVES IN PSYCHOLOGY**

This module outlines the world of psychology in order to understand the scientific underpinnings of psychology as a discipline, its historical origins, development and limitations

- **INDIVIDUAL DIFFERENCES**

This is a fundamental core module of the course which introduces key concepts in the field of Individual Differences. The module supports students to develop a broad and critical understanding of intelligence and how personality and other individual differences influence various aspects of human behaviour.

- **SOCIAL PSYCHOLOGY**

This is a fundamental core module of the course which focuses on the key areas as well as advanced concepts and theories in Social Psychology, including social cognition and person perception, attitudes and attitude change, social identity, prejudice, and human aggression. The module helps students to analyse and discuss classic and contemporary studies, particularly in relation to ethical principles.

- **DEVELOPMENTAL PSYCHOLOGY**

This module introduces students to key concepts and approaches in Developmental Psychology. The module promotes students' understanding and critical analysis of key theories of Developmental Psychology including life stage theories, cognitive development, moral development and gender development theories

---

- **COGNITIVE PSYCHOLOGY**

This module focuses on key concepts and theories in Cognitive Psychology and aims to promote students' knowledge and critical analysis of key areas of Cognitive Psychology including attention, perception, memory, language and thinking

- **BIOLOGICAL PSYCHOLOGY**

This module provides an overview of key and advanced concepts and approaches in Biological Psychology. It promotes students' advanced understanding of the role of the brain and nervous system in psychological processes including language, memory, emotion, stress, psychopathology and sensory processes

- **QUANTITATIVE RESEARCH METHODS**

This course focuses on the key skills needed to conduct quantitative-based psychological research, such as the execution and reporting of experiments, the understanding and interpretation of statistical tests, and the use of statistical packages such as SPSS or R.

- **QUALITATIVE RESEARCH METHODS**

This module introduces qualitative research knowledge and skills to psychology students and explains why and how qualitative research is carried out in psychology. A sample of current qualitative methodologies and examples of how qualitative methods may be applied in psychological settings are provided.
