### [RoEx Automix](#)

## AI Tips

- Be sure to use the *Learn* button for the AI to understand your track
- If available, use *Reference* to load in a track with the sound you like
- The settings will probably need to be tweaked even after learning

## AI Mastering

---

[LANDR](#)

[iZotope Ozone](#)

[eMastered](#)

[Exonic AI Master](#)

[Cloudbounce](#)

### AI Tips

- It's always best to start by uploading a reference track that you like the sound of
- It might take a few revisions with different settings to get the sound you want

## AI Noise Reduction

---

[Hush](#)

[Zynaptiq Repair](#)

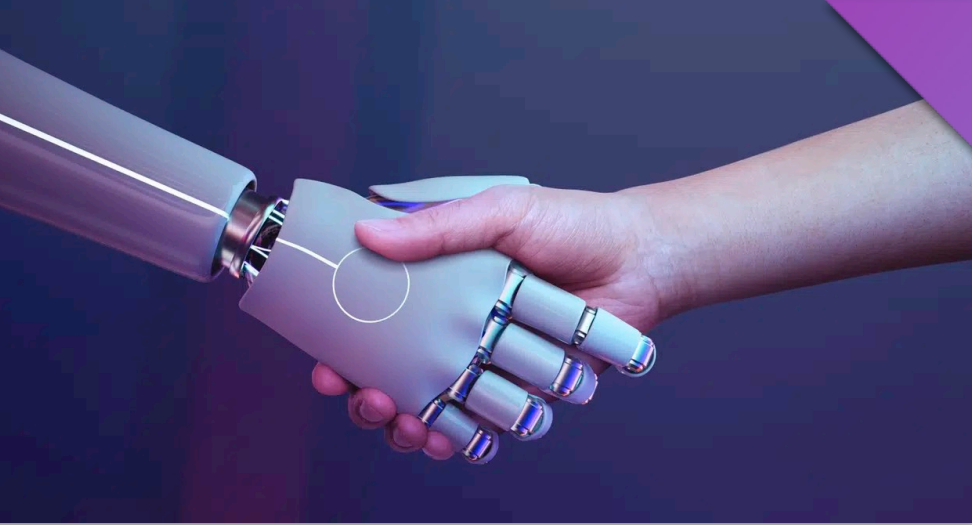

[iZotope RX](#)

[Acon Restoration](#)

[Waves Clarity VX](#)

### AI Tips

- Each noise reduction app is good at reducing some types of noises and not others
- The *threshold* control is usually the key to how well it works
- The sound may still need some tweaking even after the AI results

## AI Music Video Tools

---

[lex.page](#)

[Ink](#)

[Thundercontent](#)

[Jasper AI](#)

[Notion AI](#)

[Claude](#)

### AI Tips

- Not all chat-style AI's are connected to the internet, so their output may be dated
- Each AI will provide a different result, some more extensive than others
- Once again, the more detailed the prompt description, the better the result (multiple paragraphs are useful)
- Asking the AI to imagine itself as a digital marketer can get different, more detailed results
