

Daisy Papp Mindset Evolution Foundation

IF THE REASON FOR THE LACK OF PROGRESS IN THE DEVELOPMENT OF HUMAN VALUES LIES IN THE MISSING SCIENCE IN THIS FIELD, THEN IT IS IMPERATIVE THAT WE CREATE AND DEVELOP THIS SCIENTIFIC FIELD.

IF WE DO NOT, WE WILL BE RESPONSIBLE FOR WORSENING THE CRISIS OF THE HOMO SAPIENS ERA, BECAUSE WE PERCEIVE THIS DISASTER AND YET DO NOTHING.

Daisy Papp Mindset Evolution Foundation

Summary of our Vision

The ***Daisy Papp Mindset Evolution Foundation*** aims to preserve and promote endangered human values. We work locally and internationally in 97 countries, emphasizing the importance of building strong families, communities and societies. We support all stages of human development, from pre-birth to later adulthood, with a focus on promoting human values at each stage. We believe that future parents choosing partners who share human values creates a favorable environment for pre-birth development.

The Foundation has developed programs including an audio program for babies and parents, accessible brain-friendly instruction in reading and math, emotional health support, trauma recovery and coping skills. The foundation offers lectures and workshops based on the best-selling book *The Island Model - Homo sapiens Isolatus* that promotes personal growth and tolerance. Donations to the Foundation are an investment in the future of humanity, which seeks to transition to a society where human values are practiced by all.

How We Work

We believe that all humans can be empowered and guided towards a healthier way of living with the appropriate guidance and support. Many have traumas embedded within their bodies and minds. Victims to social conditioning are hindered in their ability to live in balance, peace, and harmony. Humans who are severely unbalanced, both emotionally and mentally, tend to pass on these imbalances to their offspring. This results in a chaotic environment within our world, as these unbalanced individuals carry and perpetuate destructive values. Consequently, this toxic ripple of circular destruction continues to affect society at large.

When does it end? What can we do?

We can unite together and ensure all humans have access to enriching materials that guide them into a healthy state that operates through key human values. It is possible to focus on the capacity to transform the toxicity in society that is creating generations with a lack of love and acceptance of themselves and each other. When we collectively operate our daily lives through the lense of key human values - empathy, love, acceptance, unity, support, and compassion, we grow into united societies that care physically and mentally.

Disease, sickness, depression, suicides, drug overdose, abuse and crimes will all cease to exist in the heightened manner they do today. Critical infrastructure and natural resources will be more plentiful-suffering will be tremendously reduced. Society will operate more seamlessly with harmony in unison with countless resources and lives saved!

How Do We Impact The World?

Funding to our foundation is critical in providing accessible programmes to all

We unite in our mission! With our proven, insightful, and simple to understand and adopt programs, we can make a significant change. But wait! There's much work to be done.

Funding provides a platform for further research in the adoption and implementation of human values and trauma recovery across a wide spectrum of humans across all sectors, race, political and societal class, and from all corners of the globe. We seek to identify the deficiencies within our society and its habitants and create real world actionable solutions that are adaptable and measurable all through the critical lens of human values.

Daisy Papp, our Founder, says: "If they knew better, they would do better."

Let us unite in this mission to heal the world of its suffering and be the change that ignites a flame in the hearts of all humans!

It only takes 5% to make a shift in our world. Let's be the driving force starting the ripple that produces an unstoppable wave of human valued living and way of being.

Let's heal the world. We are many. Together we can. **Together we are strong.**

Your Support Helps Humanity Donate today to make a difference

When you make a tax-deductible donation to the *Daisy Papp Mindset Evolution Foundation*, you're supporting the most effective solutions to the **biggest threats** that humanity faces. As a leading global promoter of human values, the *Daisy Papp Mindset Evolution Foundation* is working to advance **conserving human values** in all 50 US states and in additional 96 countries around the world. That's why your contribution is so much more than charity; it's an **investment in the future of our species, the one human family.**

WWW.DAISYPAPP.COM

We believe that **human values are endangered** and must be preserved, promoted, and further researched. When human values are brought to everyone, humans can value humanness and evolve into **humane humans**. When **humane** humans build families, strong families with human values can arise. Strong families practicing and living by human values build strong communities.

All things fall into place when human values become a trend. It **only takes 5%** of the population to **make it a trend**. Help us spread the word and making the next step in human evolution possible: from **Homo Sapiens** to **Homo Humanus**.

The development of **human values** at **every stage of life** is of great importance for human advancement. We have developed programs to provide the greatest support. When we have funding for larger scale research we will expand in this field as we see this as most important.

We support all areas of **human development**, from pre-birth to the last breath. Our main focus is on **human values**, and when humans can live in societies that care, respecting and honoring human values all stages of life can be lived with dignity through the different stages of human life.

Infancy (1-2 years)

Toddler (2-4)

Early School (5-7)

Middle School (8-12)

Early Adolescence (13-17)

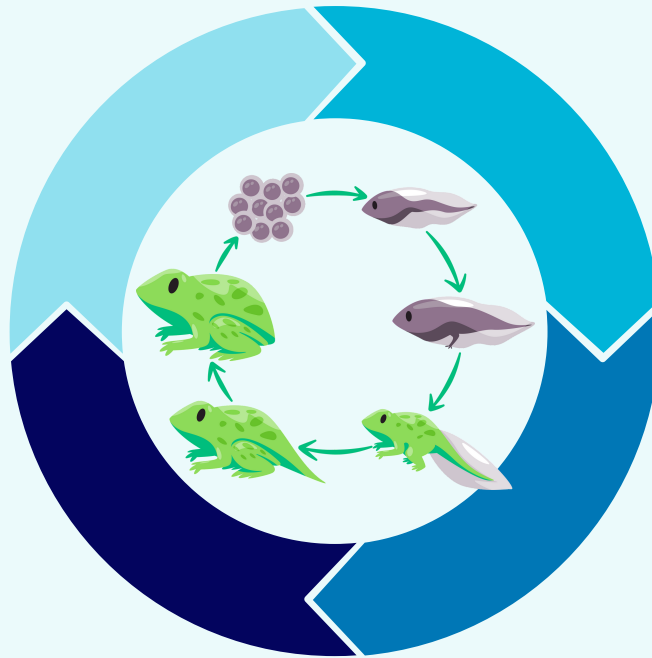

Later Adolescence (18-25)

Early Adulthood (25-30)

Middle Adulthood (30-50)

Later Adulthood (50 and up)

Where do we start the Cycle of Life ?

We could start at conception, nevertheless we prefer looking at the choice of partners first.

When humans **cherish human values**, they will naturally select, attract, and retain emotionally healthier partners. When a child is conceived by partners that live in a relationship based on human values then the pre-birth phase of development provides consequentially a more supportive environment in which the embryo develops into the baby it will be when coming into this world at birth.

We wish for all humans that are born and those that are yet to be born are able to live in a world where humans thrive and live up to their potential. **Imagine a world where all humans can find joy and beauty in being alive as a human.**

Overview

Our Programs from birth to last breath:

Birth

No one is born a perfect parent. We have developed a beautiful audio program for babies that helps them fall asleep while helping parents calm down when they feel overly stressed. The beauty of it is that the words spoken in the audio program often reflect the parents' younger years and what they most needed to hear at the time. The program supports the baby getting its much needed sleep and nourishes empathy for the newborn and parent alike.

Basics of Education

We have developed and further continue developing programs that make the basics of education easy and accessible.

The basics of reading and mathematics enable every child to become a competent learner. Let's look at some Numbers:

Reading Challenges

Thirty-five percent of fourth graders are good readers. Think about that for a moment. That means firstly, that the remaining 65% are not good readers; and secondly, until fourth grade, one of the main focuses of children in school is learning to read. After fourth grade, this is an essential skill for keeping up and learning successfully in school.

Math Challenges

Thirty-four percent of eighth graders are proficient at math - meaning that the majority of students are unable to successfully master algebra and advanced math. Success in math's is associated with higher graduation rates, successful studies and well-paying jobs. Supporting students who need a boost in math's can have an exponential impact!

Emotional Health

We deliver fast solutions that last to establish emotional intelligence, clear out the emotional backpack, and fill in the newly established void with brain-friendly, easy-to-understand tools that work.

Healing the past

All humans are traumatized. Birth itself is traumatizing, not to mention the many situations we face during a lifetime that can be traumatizing. Unresolved issues **always** create more issues. We focus on worthiness as most humans have false beliefs regarding their own value.

Once humans learn how to healthily value themselves, and that it is their actions that make all the difference, their self-belief grows naturally. Balanced humans who are curious will inspire others to reach a balanced state as well. We offer modules to all in need and those who are interested.

Education

We believe that education is important. Even more important is the ability to educate ourselves. People have different learning styles, and we focus on people's strengths. When people feel courageous, they are eager to engage in new endeavors and continue their education. When people have regained their innate curiosity, know what human values are and how those feel, it is easier for them to make choices based on their true talents and sincere interest. People who work in a field that interests them will naturally perform well.

Challenges and crisis

If the human experience is based on human values, responding to crises will be less of a challenge. We offer tools and skills that can be acquired so that people can glide more safely through storms life throws at them.

Lectures and Workshops

We are passionate delivering human values to all humans around the world. When humans come together to acquire knowledge the group dynamics bring much joy and the newly learned can be applied and practiced on the spot.

The Island Model - Homo Sapiens Isolatus

This best-selling book is the basis for many lectures for young and old alike. It enables peaceful (self-)reflection and insight that promotes personal growth and tolerance, while paving a stable foundation for understandable communication.

We also developed and deliver a workshop based on the **Island Model** book that is the foundation of everything and for everyone. When we understand that beauty can be found in diversity, we can embrace inclusivity.

The bestselling book on which this work is based on is currently available in four languages: English, Spanish, German, Hungarian. We plan to use future funding to translate the book into more languages.

5+2 The Formula for Finding True Love

We hold lectures online and face to face for live audiences about the 5+2. This piece of literature will be available as a workshop once we have the funding for producing this massive piece of work.
