Subject: Decline of Human Values and the solution to preserve and foster humaneness

10. February 2024

It is well known that technological progress does not reduce the number of problems, but rather increases them, because human values do not grow in tandem with technological progress.

As the decline in appreciation and the ignoring of human values represents a great danger for all people, attention must now be paid to increasing the focus on these values.

To avoid possible problems in the future, it is advisable to conduct trials in schools.

If you are interested in human values to grow along with technological progress, open experimental classes in kindergartens and schools, please, let us know the time of the meeting.

The cause of the decline of human values in modern society is the development of an unquenchable thirst to create evil.

A handwritten signature in blue ink that reads "Daisy Papp".
