

Brief Bio of Dr Tasneem Ahmed-Rajie
MBChB (UCT), FCOG (SA), MMed (O&G), DipObst (SA)

I am a full-time consultant working in the Tertiary Maternity Centre at Groote Schuur Hospital, Department of Obstetrics and Gynaecology (O&G), for the past three years. I have more than 15 years' experience in obstetrics, including teaching and training of undergraduate and postgraduate students.

I am pursuing a fellowship in Maternal-Fetal Medicine, with a particular interest in High-Risk Obstetrics and Antenatal Ultrasound. Our team provides expertise for inpatient management, clinical decision-making, invasive procedure technique and skill acquisition, whilst working closely alongside a multi-disciplinary team.

I have achieved a Cum Laude for my dissertation in O&G and continue to pursue research of interest in both maternal cardiovascular disease in pregnancy as well as fetal abnormalities.
