

E-DUMPER PROGRAM

For payloads up to 4 tons

EXCEPTIONALLY QUIET.
CONSISTENT.
CLIMATE-FRIENDLY.

BERGMANN

BERGMANN E-DUMPER – built for our customers.

Hans-Hermann Bergmann on the Bergmann E-Dumper family

"With our family business, we have been working successfully in close dialogue with our customers for two generations. Here we support our customers as early as the recording of the transport task and then develop ideal vehicles, taking into account the legal and social framework conditions. We go to work with passion, are down-to-earth, reliable and contribute our expertise so that we can create lasting value for our customers and our company.

As early as 2016, we started developing our e-dumpers and our battery technology. We have reconciled the environmental and climate goals with the requirements of our customers so that we can always offer them the most economical transport solution. The Bergmann E-Dumper program has all the attributes that you as a customer already know from the large Bergmann dumpers: economical, powerful, user-friendly and reliable - just BERGMANN."

Proven Bergmann quality

"What you can still rely on: The vehicles in our E family combine high transport capacity and user-friendly driving comfort with maximum operational safety. Exactly what you would expect from genuine Bergmann premium quality 'made in Germany'."

Hans-Hermann Bergmann
Managing Director

Future-proof technology

"As an innovative provider, we also see ourselves as Pioneer in battery-electric construction vehicles procreate. With our e-technology, you can prepare yourself today for the challenges of tomorrow - and benefit immediately: Thanks to emission-free drives, you have the option of using your Bergmann e-dumper in protected zones such as inner-city construction sites and to be used indoors.

For the expansion of our e-dumper range, we have developed our own modular lithium-iron phosphate battery technology in the 80-volt class, which is scalable from 8 kWh to 80 kWh in 8-kW increments. The Bergmann batteries are characterized by a extreme longevity, almost 100% recyclability and the option of opportunity charging without a memory effect."

THEREFORE

BERGMANN E-DUMPER:

THE MINI-DUMPER

All-wheel drive and articulated joint

The compact power machine

Ideal for gardens, green areas and small construction sites: Its patented articulated steering and compact dimensions make the robust C301 a manoeuvrable power pack for indoor and outdoor use. Thanks to its battery-operated electric motor, it works equally quietly, emission-free and environmentally friendly. Another plus: Unlike the small dumper with armored steering, the Bergmann mini dumper with all-wheel drive also drives over lawns in a way that protects the soil.

Full power on chain

Precise performance on difficult terrain: The Bergmann E-Dumper C901 with crawler chassis not only runs emission-free and is economical to operate. He is also not impressed by rough terrain. The C901 is available as a front tipper, high tipper and self-loading unit. A high payload, compact dimensions, quiet operation and simple and intuitive operation qualify the Bergmann chain dumper for a wide range of applications.

THE CLASSIC

Narrow, low and user-friendly

C 802

payload	1.500 kg
Long	3.208 mm
Broad	1.290 mm
Height (with rops bow)	2.215 mm
curb weight	1.560 kg
cavity volume	0,85 m³
battery voltage	80 V
battery capacity	16 kWh

Real advancement qualities

Good climbing ability meets easy operation: The Bergmann E-Dumper C802 has earned its classic status.

It easily overcomes steep gradients – and always runs quietly and with low operating costs. With its zero-emission electric drive and its compact dimensions - it is narrower and lower than many comparable models - the C802 is ideally suited for use in interior demolition or on narrow, inner-city construction sites as well as on construction sites in gardening and landscaping.

C801e - the little brother with a width of 980 mm and a payload of 950 kg

Clear and comfortable: the operator's platform

Durable technology - made in Germany

Leader for general and bulk goods

Reliably powerful and sustainably climate-friendly: With a payload of 3.5 tons, the Bergmann C804 is currently the world's largest all-wheel transporter with all-electric drive. Its compact dimensions, off-road mobility and low-noise operation make it the perfect partner for use on urban construction sites, in underground car parks and tunnels. The Bergmann C804 can be driven with a class B driver's license.

THE DUMPER PROFESSIONALS

Customer-oriented, competent, reliable: hence Bergmann Dumper

With a dumper from Bergmann, you are opting for a strong partnership from which you will benefit in the long term: in terms of service, quality and performance.

Know-how seit 1960

With over 60 years of experience, we are pioneers in the compact dumper segment.

Best quality

High-quality, long-lasting quality "made in Germany" is standard for us.

strong network

In Germany we have a nationwide dealer network and our own rental park for compact and large machines.

Down-to-earth family business

In Meppen, Lower Saxony, Hans Hermann Bergmann is the second generation to run the Bergmann company.

International service

With our sales and service partners, we are there for you worldwide.

Reliable partnership

Approachable and reliable: This is how we support you with every project.
