

THE DUMPER PROGRAM

For payloads up to 25 tons

BERGMANN

BERGMANN DUMPER

Power is a tradition here.

Hans-Hermann Bergmann on the Bergmann Dumper family

“We have been working successfully with our family business for more than 60 years in close dialogue with our customers. We support you in recording the transport tasks and then develop ideal vehicles, taking into account the legal and social framework. We are down-to-earth, reliable, contribute our expertise and go to work with passion so that we can create lasting value for our customers and our company. We have made it our task to always meet the requirements of our customers. In addition to a comprehensive portfolio of universal devices, we therefore offer you specially adaptable special machines with a transport capacity of up to 25 tons.”

Proven Bergmann quality

“What you can still rely on: The vehicles in our dumper range combine high transport capacity and user-friendly driving comfort with maximum operational safety. Exactly what you would expect from genuine Bergmann premium quality 'made in Germany'.”

Hans-Hermann Bergmann
Managing Director

TO DEMAND

The world is changing. We also.

What began in a small garage in 1960 is now home to many bright minds who understood early on that today's products shape tomorrow's future.

For small and medium-sized construction sites

As a leader in the compact dumper segment for generations, Bergmann offers three compact dumper models with the C805s, C807s and C810s. What they have in common: Their compact dimensions offer maximum flexibility on small and medium-sized construction sites. The newly developed operator's platform provides a clear view of the work area over the short rear. The ROPS roll bar of the 805s increases safety and the full cab of the 807s and 810s increases driving comfort even in adverse terrain and weather conditions. All three vehicle models are equipped with low-consumption and low-emission Stage V engines. As an alternative to the rounded body, the Bergmann C807s is also available with a three-way tipping platform.

engine power	123 kW
weight empty	11.500 kg

Dreiseitenkipper

payload	12.000 kg
Loading volume deleted	4,2 m ³
Load volume heaped	8,0 m ³
overall length	7.593 mm
overall width	2.541 mm
Headroom without rotating beacon	3,028 mm
engine power	123 kW
weight empty	11.250 kg

The right equipment for every application

The C815s wheel dumper shows that efficient work, off-road mobility, driving comfort and safety go together perfectly. On the construction site, it masters the challenges of everyday life with ease. The C815s offers the driver optimal conditions for concentrated work. The rotatable operator's platform (optional) provides the best overview both forwards and backwards. The interior of the air-conditioned driver's cab impresses with high-quality equipment.

RAD-DUMPER XL

up to 25 tons payload

Robust and safe

payload	25.000 kg
loading volume heaped	15,0 m³
overall length	9.316 mm
overall width	2.870 mm
headroom	3.353 mm
engine power	186 kW
weight empty	19.250 kg

The C828s shows what it can do in tunnel construction projects and in the quarry.

The vehicle's low center of gravity ensures a particularly high level of stability.

No-frills design. Convincing performance.

Whether in tunnel construction projects, in the quarry, in infrastructure construction or in demolition - the robust Bergmann Dumper C828s is a real workhorse. The articulated 2-axle vehicle impresses with a 260 hp engine and high payload. Its rotatable driver's platform allows driving speeds of 40 km/h forwards and 35 km/h backwards with the best overview – and therefore safety – for the driver.

Strong on everyone underground

The track dumper C912s does its job reliably even in rough terrain. The power pack on chain scores with high transport capacity, is low in emissions, economical in consumption and offers maximum safety. Two hydrostatic drive trains with full power at all times, optimal weight distribution in every load condition and the hydraulic parking brake for a guaranteed secure hold even in extreme conditions. Inclines make almost any terrain accessible. The distribution of the weight along the tracks also reduces the ground pressure significantly and protects the subsoil.

TRACK DUMPER

up to 10 tons payload

C 912

All-terrain and economical

Heckkipper

payload	10.000 kg
Loading volume deleted	4,7 m³
Load volume heaped	6,5 m³
overall length	5.963 mm
overall width	2.900 mm
Headroom without rotating beacon	3,050 mm
engine power	186 kW
weight empty	14.250 kg

Round tipper

payload	10.000 kg
Loading volume deleted	4,7 m³
loading volume heaped	6,5 m³
overall length	6.246 mm
overall width	2.900 mm
Headroom without rotating beacon	3,050 mm
engine power	186 kW
weight empty	14.850 kg

The C912s is safe, quick and gentle on the ground, even on difficult ground.

THE DUMPER PROFESSIONALS

Customer-oriented, competent, reliable: hence Bergmann Dumper

With a dumper from Bergmann, you are opting for a strong partnership from which you will benefit in the long term: in terms of service, quality and performance.

Know-how seit 1960

With over 60 years of experience, we are pioneers in the compact dumper segment.

Best quality

High-quality, long-lasting quality "made in Germany" is standard for us.

strong network

In Germany we have a nationwide dealer network and our own rental park for compact and large machines.

Down-to-earth family business

In Meppen, Lower Saxony, Hans-Hermann Bergmann is the second generation to run the Bergmann company.

International service

With our sales and service partners, we are there for you worldwide.

Reliable partnership

Approachable and reliable: This is how we support you with every project.
