

SHARI WILLIAMS Goddess of Drones

PHILADELPHIA DRONE SOCCER

What is Drone Soccer?

Drone Soccer is the only educational robotics competition that is also an internationally sanctioned team sport by the World Air Sports Federation. Opposing teams fly RC quadcopter drones in protective cages designed for full-contact game play as they ram and block each other in midair.

RULES OF PLAY

▶ TEAM COMPOSITION

Drone Soccer can be played by teams of equal size (3v3, 4v4, or 5v5). Each team roster must be coed and may have a maximum of ten players.

▶ TOURNAMENT SCHEDULE

Each Match consists of 3 Sets. The duration of each set is 3 minutes. A 3-5 minute repair countdown between Sets allows for battery exchange, aircraft repair, and substitutions. Thirty minutes are allotted for each Match.

▶ RESULTS & STANDINGS

The winner of each Match is determined by the best of three Sets. The team with the most points in the allotted time will be awarded that Set.

▶ GOAL SCORING

A point will be awarded each time a Striker successfully flies through their opponent's goal in the forward direction. The drone must pass at least halfway through the goal.
