

# RETRACTABLE SPEED GATE

## APPLICATION

- Banks
- Prisons
- Commercial/Industrial premises
- Embassies
- Military installations
- Security establishments
- Airports
- Police stations
- Banks
- High risk cargo depots
- Cash handling depots

## DESIGN FEATURES

- Rapid opening and closing cycle.
- Compact design to fit where conventional gates often can't.
- Designed for high security and durability.
- Custom styles available on customer's request.
- Gate is equipped with a fail safe protection on leading edges.
- Gate can interface with any access control system. Need a n/o contact to close and open again to trigger gate to open.

## SPECIFICATIONS

- Designed for long operational life.
- Heavy duty single phase or three phase motor.
- Power supply 380V 3-phase (25A+N+E).
- Power supply 220V 25 Amps.
- Heavy duty electrical controls.
- Pivoted on maintenance free low friction bearings.
- Safety interlocked with traffic signals.
- Positive locked in the closed position.
- Fast operation – opens and closes  $\pm 1$  sec per metre of gate (eg. Open time for 4m gate = 4 sec).
- Provides a high degree of impact resistance and security.
- Dimensions: max height up to 6m and width up to 7m.

**Due to constant upgrading and improvements, product specifications are subject to change without notice.**
