

Cero Plus Scraper

Cero Plus are manufactured on a PVC backing with borders on the long sides.

Research has shown that most of the dust and dirt enters a building through pedestrian traffic. Cero Mats provide the ultimate solution against dirt and moisture. The successive rows of monofilament polyamide fibers act as tough scrapers to knock off dirt; the alternating rows of bicolour solution dyed polyamide yarns absorb the dirt and moisture scraped off by the monofilaments, making Cero mats the most effective product on the market today.

Available colours: • Grey • Blue • Red

Technical Specifications: Cero Plus

Product Construction	Solution dyed high-twist and heat-set multi-filament nylon tufted in alternate rows with mono-filament nylon - 100% PVC backing
Size in cm (ca.)	3 x 4 ft
Fabric weight (ca.)	860 gms/m ²
Total weight	3360 gms/m ²
Pile height	9.5 mm
Electrical behaviour	EN ISO 14041 test - Antistatic
UV resistance	ISO 105-B02 test, rated 8 (max.mark)
Fire resistance classification	EN ISO 13501 test - C _{fl} - s1

All specifications are according to ISO 9001 Quality certification and ISO 14001 Environmental certification, and are subject to change to meet the ongoing improvements and innovation of our products.
