- > Environmentally friendly matting solution is made with 100% post-consumer recycled PET Polyester fiber derived from used plastic bottles
- > Rubber backing contains 20% post-consumer recycled tires
- > 3/8" thick permanently reinforced bi-level Waterhog construction effectively allows dirt and moisture to be filtered at the door and contained in the base of the mat, away from the foot traffic
- > Every square foot of a Waterhog Eco mat eliminates 4 half liter plastic bottles from the waste stream
- > May be purchased pre-seamed and bordered or rolls may be purchased separately and installed on site
- > Great for large entrances, commercial buildings, hotels, restaurants, healthcare facilities, office buildings and more
- > Roll Size (Does not include nosing)  
6' x 67' (184cm x 2020cm)
