OUR STORY AND VISION

PCFX Computers Resellers is a VAT registered Closed Corporation that is located in Pietermaritzburg - REG NO: 2007 / 048 078 / 23 ; VAT NO: 459 023 8681 and is also a Level 1 BEE Contributor and is 100% owned by Sole Member Deon Pillay who brings over 20 years of IT experience and expertise to the marketplace.

Instacam is a brand of PCFX & was created when Deon endured his own frustrations of acquiring a basic CCTV solution for his own home & business. Deon was quite determined to stop installers from messing up his newly renovated home & office but messy drilling, grinding, excessive cabling, untidy on surface trunking, cabinet, network equipment, pc monitor & complex & expensive CCTV installers seem to be unavoidable.

Frustrated, Deon canned the CCTV project for 12 months & instead endured a years worth of expense & research of potential smart wire free security solutions in 2018, Deon was finally satisfied & settled on the Reolink brand from China. Soon after, the Instacam brand was born and released to South Africa via online marketing channels like their Web Store, Takealot.com & Makro Marketplace & has been gaining momentum since.

Instacam, Simplified Instant Video Security for South Africans. We offer highly innovative & superior quality cameras at the right price. Boasting under 5 minute self installations per camera, these revolutionary wire free, WiFi, weatherproof cameras are becoming the forefront of protecting families, homes & small businesses in SA.
