# HOW TO APPLY

## EnviroNize BEAUTISAN™

- **IS A CONCENTRATED ELECTRO-CHEMICALLY ACTIVATED SOLUTION** rich in oxygen, in which pathogens cannot survive.
- **IS A POWERFUL ANTIMICROBIAL SOLUTION** that is both biodegradable and non-accumulative.
- The key active ingredient, hypochlorous acid, is a naturally occurring molecule synthesized from an electrolyzed solution of salt and water.
- **IS NON-WHIMS REGULATED** at pH Neutral
- **CAN PENETRATE** pathogenic microorganism cell walls
- **IS HIGH IN ORP SOLUTION** (ORP above +900mV)
- **ATTACKS AN ARRAY OF MICROBIAL ORGANISMS**, a process that is chemically selective with no toxic or mutagenic side effects for higher forms of life.
- **IS SAFE** when used around plants, animals, marine or humans
- **IS AN ENVIRONMENTALLY CONSCIOUS** and sustainable solution

## DISINFECT all high-touch surfaces

## How To Disinfect Manicure Tools, Combs And Brushes

FILL Disinfection Soaking Jar with **EnviroNize BEAUTISAN™**. Clean hair and debris from manicure tools, combs, and brushes prior to submerging, and let soak.

**i** To remove any biofilm and/or surface residue build up, see instructions for deep cleaning using **EnviroNize Catholyte™** prior to disinfection.

WAIT **EnviroNize BEAUTISAN™** begins working on contact. Follow label instructions for specific contact times or allow to remain on surfaces up to 10 minutes for full disinfection. Remove manicure tools, combs, and brushes from the soaking jar and towel dry\* using **EnviroNize Anolyte™ Green** color-coded Micro Fibre Towel. **\*Maximum 10 Minutes Submerged | Towel Dry**

# DEEP-CLEAN

# CRITICAL AREAS

# ENVIRONIZE PRODUCTS

# HOW TO APPLY

## EnviroNize Catholyte™

**AN IMPORTANT STEP IF THE SURFACE HAS NOT BEEN PREVIOUSLY DEEP CLEANED.**

- It is an **ALKALINE PHOSPHATE-FREE DETERGENT** water-based solution high in pH 10~13.
- **PREPARES HARD NON-POROUS SURFACES** and readies it for the disinfection application.
- **REMOVES CONTACT SURFACE RESIDUE** such as organic and pesticide residues (BIOFILM) which prevents effective cleaning and disinfection.
- **USED AS A DRAIN CLEANER** to keep drains from becoming clogged by emulsifying fats and greases that stick to drainpipes and in sink P-Traps.
- **USED AS AN ADDITIVE IN LAUNDRY AND CARPET CLEANING** providing deep cleaning to heavily soiled, hard to remove dirt from woven fabric and carpet fibers.

## DEEP-CLEAN all high-touch surfaces

- Chairs
- Carts
- Head / arm rests
- Counters, tables
- Doorknobs and drawer handles
- Electronic equipment
- Sinks, shampoo bowls
- Hoses/spray nozzles
- Pedicure bowls, toilets
- Styling/treatment tools
- Mirrors, equipment
- Accessories
- Massage rooms/equipment
- Reception/waiting areas
- Storage areas and containers
- Washable food and non-food contacts.

## COMPARE: How to Improve the Bottom Line

THE BIG DIFFERENCE IN PERFORMANCE | DESIGN | SAVINGS

### Other Brands

No Replacements  
No Recycling  
Waste 10-15% of the solution  
Expensive to refill (proprietary cartridge)

### EnviroNize®

Cleanses, Soothes, Vitalizes, Refreshes, Invigorates  
Refill from larger, more economical container  
Eliminates recycling • No proprietary cartridge  
All natural • Certified organic • No alcohol

## Cleaning and Disinfecting: Added Protection

### SOLUTION DEPLOYMENT DEVICES

[Learn More](#)

**Added Protection and Protocols:** Areas beyond common, high-touch surfaces where "Primary Disinfection Protocols" are inaccessible or the area is too large to provide proper Primary Disinfection

#### Provides an Extra Layer of Protection

The key to successful cleaning and disinfection is to ensure the common, high-touch surfaces and areas that bear the brunt of traffic are properly cleaned and disinfected regularly. Areas where touch cleaning and disinfecting protocols cannot be reached or adequately implemented require an added layer of protection. These areas are classified as:

1. Hard-to-reach outside common high-touch areas
2. Irregular surfaces making common touch surfaces difficult to disinfect.
