## Tradition, Competence and Flexible Trading Carl Hamm Group

With our portfolio of services and products, we are an internationally recognised partner for companies in the water, waste water, energy, tunnel construction, well sinking, domestic installation and surface and underground mining industries.

Since 2009, we have had a new production hall for manufacturing stainless steel pipe components.

Our 80-year company history proves that we have always had the future firmly in our focus. Our modern, mid-sized company management continues to give us the necessary flexibility for successful customer and project-oriented production.

Our aim is to provide all-round solutions for our customers - a competent partner for all projects, both national and international.

## Outstanding possibilities

### Stainless steel products and services

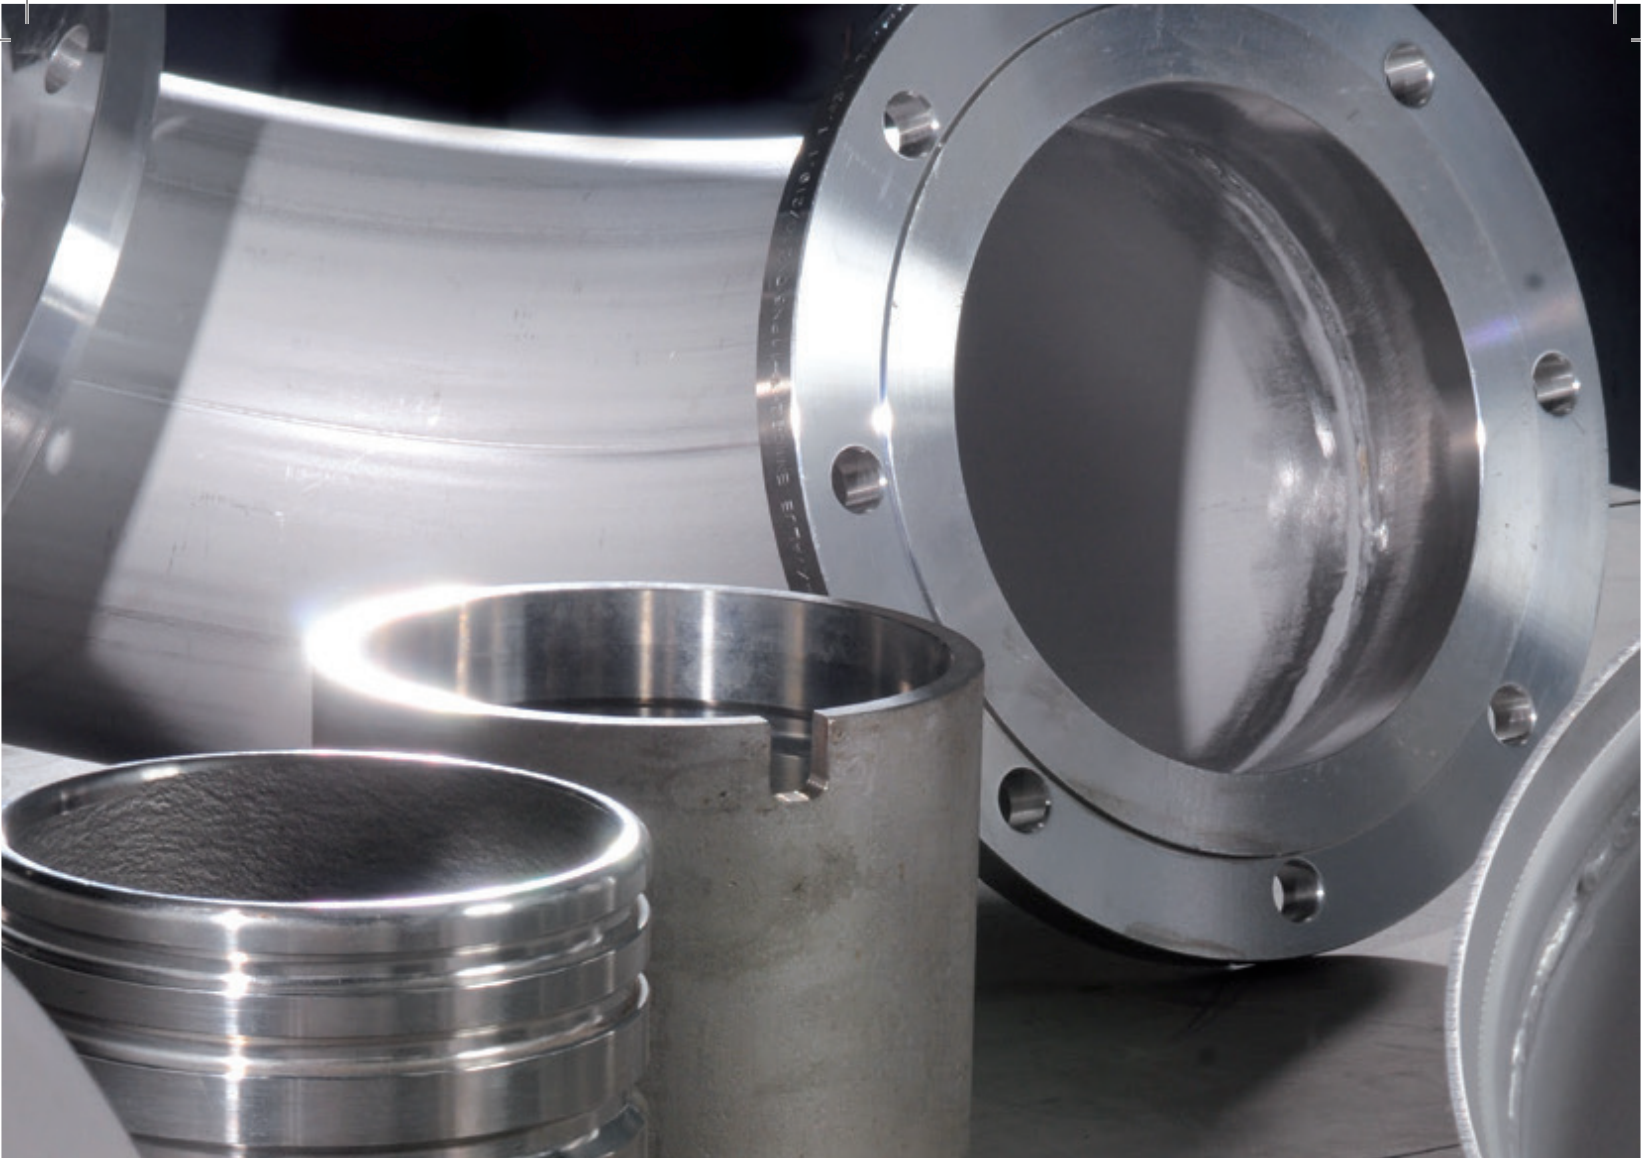

- classic fittings production based on DIN/ES/ISO/ASA/ANSI standards
- special designs to drawings and customer's specifications
- prefabrication ready for assembly
- stainless steel pipes as integrated systems
- various connection systems:  
ZSM (tight sleeve connection), flanges and quick coupling systems

### Complete and individual solutions thanks to wide product range

An extensive range of machinery guarantees we can manufacture and deliver at short notice.

We develop, stock and produce on an area of approx. 34,000 square metres in Essen-Kupferdreh.

# Stainless Steel

## Outstanding Service

Our international pool of experience in a wide variety of projects makes us an efficient partner.

### We offer you:

- support in planning and implementation
- project-related further developments
- non-destructive testing during production
- issuing of inspection certificates to EN 10204

We have demonstrated our wide range of services, for example, in the following projects:

### Projects

- **Water supply/water utilities:**  
Pipes and fittings
- **Local authority associations:**  
Heat exchangers to customer's specifications
- **Mining:**  
Flanged pipes in DN 450
- **Industry:**  
Special designs to customer's requirements
- **Trading:**  
Pipes and fittings for quick coupling systems

## Quality Management

We can produce various certificates of process reviews, individual welding qualification certificates for all our MAG, MIG and TIG welders and authorisation to transfer markings for metallic products (restamping) with test certificate 2.2 and 3.1 according to DIN EN 10204:2005.

We guarantee certified quality through ISO 9001:2008 controlled manufacturing process monitoring and final inspection.
