PROZONE INTU PROPERTIES LIMITED

Prozone Intu is a specialist retail and residential-led mixed-use real estate development company, harnessing Intu Properties plc experience as UK's largest retail real estate developer combined with Provogue (India) Ltd's in-depth knowledge of the Indian market. The company has a strong balance sheet, a large land bank fully paid, a planned pipeline of projects and a strong domestic execution team.

Intu Properties plc is a FTSE-100 Company listed in UK and has an asset valuation of more than 7.6 billion pounds. Intu Properties plc owns 15 properties, 10 of the top 25 shopping centers with a dominant market share. Two senior board members of Intu sit on the board of Prozone Intu.

The business model is to acquire large land parcels at select locations in high growth corridors within city limits. Subsequently design, develop, execute and manage high quality Regional Shopping and Entertainment Centres and on the conjugant land bank to develop and sell mixed-use Residential Townships and Commercial Office Blocks to create new 'city centres' across the rapidly evolving Indian urban landscape.

The overarching plan is to develop long term scarce assets with properties that optimize the intrinsic value of the land with sale of Residential and Commercial units to monetize the land banks facilitating the creation of debt-free retail assets generating annuity income over the long term. As India's retail market matures, quality retail real estate assets are expected to develop high yield compression ratios.

Prozone Intu has attracted investments from major institutional investors, notably the Triangle Fund (anchored by Old Mutual Group, South Africa) and the Lewis Trust Group, UK.

The Company owns six land banks in strategic city locations across the country comprising a total of 17.8 million square feet of developable area. By 2018, In the next 3-4 years, Prozone Intu forecasts to develop 2.2 million square feet of retail assets, plus 9.7 million square feet of mixed-use assets, with a balance of 6 million square feet of FSI, on its existing land banks, available for further development. The company has achieved financial closure on construction finance required for projects in the pipeline.

LETTER TO SHAREHOLDERS

Dear Shareholders

It's my pleasure to share with you our annual review and highlight the key fundamentals of our business plan that I believe will optimize the valuation of Prozone Intu Properties Ltd over the long term. The company changed its name from Prozone Capital Shopping Centres Limited to Prozone Intu Properties Limited in 2014 to align with the new name of our UK partner, Intu Properties plc (formerly Capital Shopping Centres Group plc).

Our priority now is on execution of the investments we've made over the years. Continued development of our existing projects is in full swing and we will begin the process of unlocking significant value this year. Let me first outline our strategy relative to the current market conditions.

The Market Dynamics

Despite slower recovery of the Indian economy than hoped last year, with GDP growth under 5%, inflation at over 10% and pressure on currency weakening the Indian Rupee, all signs suggest that economic confidence is returning following the election of a new pro-development Government. Real estate businesses must in any case take a longer term view of the market in light of the gestation periods required to fructify value.

We believe that India's economic fundamentals over the long term are driven by three key factors: Rapid urbanization with over 50% of the population forecast to be urbanized by 2020, from current level of 29%; High youth population, which is the prime driver of consumption, with over 70% of the population under 35 years; and a savings-driven economy - as India has no real social security system, over 50% of Indian savings, projected to be \$10 trillion over the next 10 years, is expected to be invested in residential real estate.

Urbanization gives rise to new major cities emerging in Tier II and III sectors, as the major metro cities are already choked and highly priced. This is further fuelling an already wide housing supply/demand imbalance especially in the mid-to-upper level residential sector where we operate. This backdrop fits perfectly with our original strategy for Prozone and our existing investments into Tier II cities.

Our Business Strategy

We operate two distinct business models that are harmonized to optimize value. The Build to Lease model for retail shopping centres generates a rental income stream and delivers long term value through yield compression. The Build to Sell model

for residential and commercial developments unlocks value shorter term through cash flows from property sales.

Retail infrastructure can become one of the most valuable, 'sticky' assets in a real estate portfolio over the long term. However, under the economic conditions of the past couple of years, we decided to slow down our retail development and reduce the mall sizes to align with the market. Developers in Tier II & III cities have been hit the hardest in the softer market but now with improved economic indicators and consumer confidence beginning to return we believe the time is right to go forward with our retail projects.

Two other factors are affecting the retail infrastructure business. Ecommerce is growing exponentially and putting pressure on many types of offline retail. Many retailers are therefore more cautious about brick-and-mortar expansion and as a result we're redesigning our mall tenant mix to be more experiential and adding more entertainment elements. Additionally, with the influx of foreign brands entering India seeking world class trading platforms, the value of quality retail space will rise. There is a scarcity of high quality shopping malls and, with our partners, we have ensured our malls are designed to the highest international standards.

In the residential sector we have developed key differentiators that meet homebuyers' contemporary needs and give Prozone Intu a distinct USP. Our strategy is to anchor each scheme with required site infrastructure and facilities first and have all approvals in place before we launch a project. This way we exhibit the quality of our projects and give our customers the confidence of on-time delivery. In general Residential sales have been sluggish last year, but the mid-level segment in Tier II cities, in which we operate, is growing so we are moving ahead swiftly to develop and launch our residential townships.

Operations Overview

The Aurangabad mall has exhibited steady growth in trading densities, and retailer sales. We've increased our marketing spends to ensure we continue to add footfall in a softer market and as a result we continue to increase our market share in the city. Our first commercial office tower (Prozone Trade Centre) of 190,000 square feet, which was presold, is under construction, but as the commercial office sector is slow, we're timing the completion in line with demand. The Aurangabad 'street market' (Saral Bazaar) of 55,000 square feet in the lower ground floor is 65% sold, nearing completion and should be open by the end of

Continued development of our existing projects is in full swing and we will begin the process of unlocking significant value this year

2014.

In Coimbatore, shopping mall leasing is in progress for key anchor tenants as well as the multiplex plus entertainment zone. We also have strong interest from both national as well as the local/regional retailers. The residential township's sales office, show flat, clubhouse and landscape infrastructure is under construction and should be completed by end 2014. We plan to launch the project for sales in early 2015, within this financial year.

In Nagpur mall design is completed but we are focusing on residential first such that the cash flows generated will fuel construction costs of the retail segment. The residential sales office, sample flat and site infrastructure has been completed and the pre-launch was extremely well received with sales of over 340 units. The clubhouse and infrastructure is under development and we will begin the first phase of residential construction and restart sales in second half of 2014.

Our focus is on timely execution, attuned to market demand, and cash flow management. Revenue recognition from our key residential projects is expected to generate strong cash flows this year and grow further in FY16.

Financial Performance

The company achieved total consolidated revenue of Rs 59 Crore against the last year's total consolidated revenue of Rs 84 Crore. The Aurangabad mall rental income remained steady. This lower revenue reflects that there were no commercial office sales in FY14, whereas we had presold the first office tower in Aurangabad the previous year. We'll see revenue climb sharply once our residential properties go to market. The company earned consolidated EBITDA margin of Rs 21.39 Crore against Rs 25.76 Crore the previous year, down 17%. This was largely due to increased power costs and additional marketing expenditures in the Aurangabad mall, required to maintain footfall in a softer retail market.

We benefit enormously from the knowledge and expertise of our Board and our strategic investors, the Triangle Fund and the Lewis Trust Group, whose continued support is greatly appreciated. I'm also grateful to all our employees throughout the company for their passion, loyalty and dedication to achieve excellence.

It's been an 8-year journey for all of us in Prozone Intu so far. Always our primary concern is to protect our investment portfolio through prudent analysis of markets and careful deployment of finances and we've now reached a 'tipping point' where unlocking value will begin in earnest. I'm extremely grateful for your confidence; it's going to be a great journey ahead and I'm glad we're together to enjoy it.

With best wishes,

Nikhil Chaturvedi
Managing Director

LETTER TO SHAREHOLDERS

Dear Shareholders

I'm delighted to have the opportunity to address you again after our 2nd year as an independent company. Our overarching resolution is to build a high quality real estate business that will deliver excellent returns over the long term and be recognised as a leader in quality, transparency and efficiency in both execution and on-time delivery to our customers. We therefore strive for excellence in all that we do. Our goal is clear - to be the best specialist mixed-use property development company in India.

In my letter this year I will focus on our Residential portfolio and apprise you of our progress and our plans for the future. In summary our residential real estate model is tuned for long term high growth and will deliver the cash flows to anchor our balance sheet, fuel expansion and create a world-class company.

The Residential Environment

India's rapid urbanization is the key driver for residential market expansion. Over 300 million more people are expected to move into urban centres by 2020 and as the major metros are already overcrowded and high priced this will lead to the emergence of major new cities in the Tier II and Tier III sectors. For example in 2014 there is estimated to be an undersupply of approximately 19 million residential units of mid level housing and there is no end in sight for this supply/demand imbalance. When we founded Prozone Intu in 2006, this was our vision and our investments in land banks in Tier II and Tier III India can now be and are being harvested.

Recognizing the need to fast track infrastructure development, the new Government is expected to introduce policies that will accelerate the real estate sector's approvals processes and enable us to realize our value additions earlier and streamline our execution plans.

Development Strategy

Of our four current major projects in Aurangabad, Indore, Coimbatore and Nagpur, we have decided

that Indore, Coimbatore and Nagpur should be residential-led rather than retail-led mixed-use developments. By developing residential first we can unlock cash flows to enable us to build debt free retail assets on adjacent land later once a community has been established. And commercial real estate is a natural next step as global models prove that as new communities emerge people want to work and live within convenient distances.

All our residential developments are being carefully phased to improve realizations at each stage. Our strategy is to fully develop the land infrastructure and the clubhouse and gardens first before we go to market. Then we develop the residential community in phases, unlocking higher values at each phase. Even when all our present residential projects are completed we will still have residual balance FSI primed for further development at scarce land values. Specifically, in our current land bank of 17.9 million square feet of constructible area, fully paid, once our 4 mixed-use projects are completed, we will have a residual FSI of 6 million square feet of high potential value realization.

Performance Report

The development of land infrastructure, show homes and clubhouse facilities are underway in all three residential projects and will be completed by September/October 2014. We are planning to launch residential in Nagpur and Coimbatore first, in the 4th calendar quarter this year, and we should expect to see cash flows emerge from these projects in the FY15 fiscal and contribute significantly in FY16.

We pre-released some residential units in Nagpur early this year and received an overwhelming response to the design and quality of our homes and the facilities we are providing the residents.

The developments under execution will mature by 2015/16 and as new projects take 2-3 years to fructify, we are alert to other land parcel opportunities at a time when attractive options are available because of the tightening in the economy.

Our residential real estate model is tuned for long term high growth and will deliver cash flows to anchor our balance sheet, fuel expansion and create a world class company

In Appreciation

We highly value the experience and confidence of our partners and investors in Prozone Intu. Our partners, Intu Properties plc, UK allow us to harness their more than 35 years of international experience across real estate sectors and a proven track record of solid financial performance and consistent delivery.

We also benefit greatly from the hands-on relationships with Triangle Real Estate India Fund and LTG International. The Triangle Real Estate India Fund is co-promoted by ICS Realty Group, India and Old Mutual Investment Group Property Investments, South Africa, who have developed large real estate projects on a global scale for over 50 years. LTG International, promoted by Lewis Trust Group, UK is an investment company that operates retail stores, real estate, wealth management business and hotels globally.

I'm proud of our experienced and well-qualified professional teams in architecture, engineering, construction, project supervision, finance and accounting, marketing and sales. This strong in-house management backbone works with renowned consultants and contractors with proven track records to deliver and manage the quality, scheduling and cost of materials of our business.

In closing I want to thank every one of our shareholders for their support, loyalty and trust in our company. After 8 years of hard work together we are ready to see the benefits of a sound business model that we've put in place carefully to optimize long term value. Our strong, almost debt free balance sheet, shields us from the economic uncertainties that many other developers must face in today's market. We are on track, we're ready, and a great future awaits us.

Sincerely,

Salil Chaturvedi

BUSINESS PHILOSOPHY

Providing customers with world-class quality and experience is the core philosophy behind Prozone Intu.

Regional Shopping centres are designed and developed to be convenient, comfortable and safe. Overall we aim to provide people with the perfect shopping experience allowing us to nurture enduring relationships with retailers that delivers long-term growth for our retail vertical.

We believe that luxury is in the details, so every aspect of design and development is planned 'inside-out' to the minutest detail. Residential townships are planned in large open-spaces to the highest quality standards, with world-class features, delivered on time to create affordable luxury residences in India's booming new urban landscape.

Typically the business model is to utilize 75% of the land as Residential & Commercial on a Build & Sell model and 25% of the land to developed Retail on a Build & Lease Model. Cash flows from the sale of Residential and Commercial support the construction costs of Retail assets enabling debt retirement sooner and the surplus cash flows fuel future growth.

In the foreground, there is a paved area with a grid pattern and some greenery. The background shows a green field, possibly a sports field.

CONSUMPTION-LED REAL ESTATE

India is a unique opportunity having 17% of the world's population but only 3% of the world's landmass and 25% of the world's youth under 25, with 54% of India below 25 years and 72% below 35 years. Youth is the trustee of prosperity and India's modern society is an 'earn and spend' culture unlike the older generation.

India is also experiencing massive urbanization with over 50% of the population expected to be urbanized by 2020, from current level of 29%. This will result in over 300 million new people flocking to urban centres thereby fuelling demand as society shifts to a nuclear family culture. This rapid urbanization is changing the urban landscape as large cities such as Mumbai and Delhi are choked giving rise to the emergence of Tier II and III cities as India's new urban metros.

In a savings driven economy, and with no real social security system, the propensity is to buy homes as protection for the future. Over 50% of India's projected savings of \$10 trillion over the next 10 years is expected to be invested in residential real estate.

The combination of these three factors fuels consumption and is creating an urban housing supply/demand gap that is forecast to last for a decade or more, thereby unveiling opportunities to develop affordable, luxury residential real estate across the Indian landscape.

CONSUMPTION-LED REAL ESTATE

India has one of the highest growth retail sectors in the world with youth being the main driver behind the robust long term consumption story. Retail is the prime driver of the new Indian economy and represents approximately two-thirds of overall consumption. At over \$500 bn in 2013 retail is forecast to grow to \$1,000 bn by 2020. This is reinforced with 100% FDI now allowed for single brand retail and 51% FDI allowed for multi-brand, encouraging the entry of foreign players that is spurring growth of the organised retail sector. Organised retail is currently only 6% of India's total retail but is growing at approximately 15% per annum leading to strong demand for quality retail infrastructure.

REGIONAL SHOPPING CENTRES

Large scale Regional Shopping Centres provide shoppers with all their needs, in one place for the whole family. By developing and actively managing our

centres to offer the right mix of retail, leisure and catering we deliver compelling destinations for shoppers and become the landlord that retailers want to do business with. Our mall management philosophy is to develop powerful footfall, and to ensure our centres provide the right trading environment for the community. This results in attracting a broad cross section of retailers in order to create long-term and sustainable growth in net rental income.

Prozone Aurangabad mall was successfully launched in October 2010. Anchored by India's leading retailers, the mall is operating with 79% of its retail spaces filled. In a city of 1 million people, the mall is averaging 600,000 customer visits per month and is acclaimed as the major shopping and entertainment hub for the Marathwada region of Maharashtra. Two more projects are in advanced stages of design and preparation in Nagpur and Coimbatore.

RESIDENTIAL COLONIES

In a market where there are concerns related to delivery of residential real estate, our differentiated strategy is to develop and have in place all site infrastructure, landscaping and the clubhouse before we launch the project.

The mission is to create aspirational living environments with all modern amenities to luxury standards on the lines of successful international models. Prozone Residences are designed not just as a way of living, but also as a lifestyle.

We believe in designing homes as affordable luxury, keeping in mind the dwellers perspective. The overall deliverable is a gated community with a traffic free landscape, uninterrupted views, privacy and a safe & secure environment for the family.

We design timeless facades in a way

that the elevation of the building remains clutter free. Our attention to the details and convenience finds expression in spacious living rooms, which open in to delightful sun decks and Master bedrooms with grand walk-in wardrobes.

Private sun decks attached to the living rooms, luxurious french windows in all rooms ensure ample natural light and ventilation for the home. We understand the desire for privacy and we have therefore sacrificed additional residential structures and increased the distance between buildings just so that no two apartments look in to each other.

A members-only residential club of around 40,000 square feet with 4 acres of landscaping incorporating banqueting, swimming pool, Jacuzzi, spa/sauna, outdoor games like lawn tennis, cricket practice net, basketball and indoor games like squash and badminton make Prozone

residential colonies an ideal family centric community.

The landscape areas are adorned with walking/jogging paths and meditation areas, outdoor dining gazebos, amphitheatres and more plus separate play areas for kids, free from vehicular movement ensuring safety for the children.

Prozone townships provide high level security such as swipe card entry for residents, video door phone, security passes for maids & service staff, intercom connectivity, advanced fire fighting systems, high speed elevators with automatic rescue devices and 24 hour power back-up for elevators and common areas.

Three residential colonies are in advance stages of development in Nagpur, Coimbatore and Indore.

COMMERCIAL OFFICES

Experience from other markets has proven that people want to live near their workplace and live close to great retail and entertainment destinations. Companies are also keen to move their offices into

these locations as it attracts and retains the best staff. Commercial developments therefore form the third tier of Prozone Intu's development model, designed to create India's new city centres.

In Aurangabad, the first commercial office xfeet was pre-sold within its first week of launch and construction is well advanced.

MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMIC OVERVIEW

Economic growth in India is projected to pick up gradually in the coming year after remaining near a two-decade low in 2013. GDP is estimated to expand to 5 – 5.5% in 2014 - 2015, up from 3.9 per cent in 2013.

The moderate recovery is expected to be underpinned by stronger consumption and investment in the context of enhanced macroeconomic stability, lower inflation, stronger external balances and more stable currencies in recent quarters. These conditions are expected to support business and consumer confidence thereby fuelling increased foreign investment and domestic demand. External demand is also projected to improve in 2014-15 as economic activity in developed economies gains momentum but the strength of the recovery in India would be restricted by structural impediments, including energy and transport constraints, political restructuring and a historic lack of economic policy reforms.

INDUSTRY OVERVIEW

Real estate in India continues to be a favoured destination globally for investors, developers and non-resident Indians (NRIs), driven largely by investor-friendly government policies and increasing globalisation. The second largest employment generation sector after agriculture, real estate contributes about 6.3 per cent to India's gross domestic product (GDP). The foreign direct investment (FDI) in the sector is expected to touch US\$ 25 billion in the next 10 years from its current US\$ 4 billion.

The sector's progress is driven by factors such as rapid urbanisation, a growing trend towards nuclear families, positive demographics, rural-urban migration, ever-developing infrastructure, higher income levels and housing demand. The real estate sector, with its growing investment opportunities, is expected to post annual revenues of US\$ 180 billion by 2020 a compound annual growth rate (CAGR) of 11.6 per cent. India needs to invest US\$ 1.2 trillion over next 20 years to modernise urban infrastructure and keep pace with the burgeoning urbanization.

Market Dynamics

The real estate sector in India is witnessing rapid growth in the residential, commercial and industrial segments. Real estate development, once restricted to bigger cities, have shown marked progress in smaller cities and towns owing to availability of banks loans, higher earnings and improved standard of living.

The demand is expected to grow at a CAGR of 19 per cent in the period 2010-2014, with Tier II and III cities expected to account for about 60 per cent of this growth.

Today, Delhi-NCR accounts for about 30 per cent of the total mall supply in India with 53 per cent of demand for

total mall space projected to come from the country's emerging smaller cities in the period 2014-2020

FDI Policy Initiatives

According to the existing FDI policy, 100 per cent FDI in the construction development sector is permitted through the automatic route. DIPP is looking at relaxing FDI norms further to encourage investment. It has also proposed a reduction in the minimum capitalisation for wholly-owned subsidiaries from US\$ 10 million to US\$ 5 million, and from US\$ 5 million to US\$ 2.5 million for joint ventures with Indian partners.

BUSINESS OVERVIEW

Business Policy

Prozone CSC maintains generally accepted standards of corporate conduct towards its employees, consumers and society at large. We believe that the policies must balance individual interest with corporate goals and operate within the accepted norms of propriety, equity and sense of justice. The Company believes that it is rewarding to be better managed and governed and to align and intensify its activities with the national interest. The Company makes all round efforts in its pursuit to enhance market share and enhance shareholders value in the industry.

Prozone CSC Operations

To capitalize the opportunities in the retail business, the Company is in the process of developing properties for commercial purposes including development of regional shopping malls. Prozone CSC has collaborated with, UK based, Intu Properties plc (formerly known as Capital Shopping Centres Group Plc) to develop shopping malls. Being associated with one of the leaders of retail real estate development, the Company is aiming to open international scale shopping centres across India designed and built to international standards. Aurangabad was the first to open in October 2010 housing approximately 0.8 million square feet of India's best retailers, entertainment centres and restaurants.

In addition to the retail shopping centres, Prozone CSC is developing mixed-use properties in the residential colonies and commercial office blocks segment on land adjacent to the retail developments.

Internal Control System and Adequacies

The Company has adequate internal control procedures commensurate with the size and nature of its businesses. The internal control system is supplemented by extensive internal audits, regular reviews by the management and well-documented policies and guidelines to ensure reliability of all records to prepare financial statements and other data. Moreover, the Company continuously upgrades these systems in line with the best accounting

practices. The Company has independent audit systems to monitor the entire operations and the Audit Committee of the Board regularly review the findings and recommendations of internal audits.

OPPORTUNITIES AND THREATS

Opportunities

The retail sector in India is today one of the fastest growing business segments in the country, comprising 13 million outlets and employing over 18 million people. Rise in disposable income, changing lifestyles and favourable demographics are the key factors driving this growth.

With organised retail expected to grow at a steady rate of over 20% per annum, India's consumption story continues to provide the Company immense opportunities. Our strong partnership with Intu Properties plc further helps the company to leverage this position.

Large investments in new retail concepts are changing the rapidly evolving organized retail landscape in India. This is not just restricted to the metros but has also spread to Tier-2 and Tier-3 cities. Prozone CSC is expected to benefit significantly from a combination of the growth in retail and as the rise of the consuming class in Tier-2 and Tier-3 cities continues.

Threats

Apart from ever shifting real estate scenario and the emergence of new retail estate players, demand for talent in India and abroad may result in increasing attrition of employees. China may too emerge as a rival in the longer run to the Indian retail infrastructure industry as it has rapidly been increasing its retail base and the demand for skilled manpower outstrips the supply. The Company has adopted policies that will attract and retain the best talent and has implemented an ESOP Scheme in order to retail its high record of loyalty.

RISK MANAGEMENT

Economic Risk

A slowdown in economic growth in India could cause the business to suffer as the Company's performance is highly dependent on the growth of the economy, which in turn leads to a rise in disposable incomes and resultant consumption.

Favourable population growth, a large pool of highly skilled workers, greater integration with the world economy and increasing domestic and foreign investment suggest that the Indian economy will continue its growth momentum for several years to come. This will also provide impetus to the retail industry, which is estimated to grow to circa \$1,000 billion in 5 years from about \$490 billion in 2012.

Business Risk

The Company operates in high growth urban centres, where retail consumption is being fuelled by a strong migration of the working population from smaller towns and rural areas. If this rate of urbanisation were to slow it would in turn slow absorption rates of the real estate infrastructure in the development pipeline. However through a carefully planned phased development strategy, the management of the Company has reduced the risk to a minimal level.

The Company has a low debt equity ratio and is well placed to take care of its borrowings. The foreign exchange transactions of the Company are suitably covered and there are no materially significant exchange rate risks associated with international trade.

Shopping Mall Risk

Large scale retail infrastructure's success is subject to well designed architecture and services that will meet the needs of retailers and consumers over the long term and a strong and growing catchment area that will provide an increasing supply of consumers. The company believes that in the case of Aurangabad, which is open, and in other cities, which are preparing for development, both these risks have been mitigated. The population numbers in the catchment areas of each site in these Tier II cities are growing and therefore should present no major long term risk to the business. In addition the Company's joint venture partnership with Intu Properties plc that has more than 30 years of experience in developing large scale retail infrastructure has ensured that architecture and services have been designed with a long term perspective to meet the needs of retailers and consumers alike and therefore do not represent significant risk to the business.

Brand Risk

Any event that tarnishes the image of the Prozone CSC brand can lower the value of the brand and adversely affect the Company's business.

The Company ensures that none of the characteristics and attributes of the brand are compromised within the Company's communication to its customers or its trade partners. The Company also gives wide focus on customer preferences and conducts extensive in-house research to maintain top-of-the-mind recall with the customer base with respect to the brand. The Company believes that it has an appropriate mitigation plan in place to handle brand risk.

HUMAN RESOURCES

The Company regards its human resources as amongst its most valuable assets and proactively reviews policies and processes by creating a work environment that encourages initiative, provides challenges and

opportunities and recognizes the performance and potentials of its employees.

Focused and organized investment in training and development, continuance of productivity improvement efforts and an employee satisfaction survey are some of the highlights of our ongoing HR activities.

Industrial relations across different locations of the Company were cordial during the year and the Company continues to maintain its focus on human resources development. The total number of employees of the Company as on 31st March 2014 stood at 12.

OUTLOOK

A strong latent demand for retail, residential and commercial real estate with the markets Prozone CSC has selected, positions the Company as an integrated real estate player in the growing domestic consumption story. With the Indian economy on a firm foundation and the organized retail industry surging, the Company is confident that it is well placed to take advantage of the growth opportunities in the coming years.

FINANCIAL PERFORMANCE

Revenue, EBITDA and Profit after Tax

The company achieved a total consolidated revenue of ₹ 58.80 Crore against the last year's total consolidated revenue of ₹ 84 Crore. This is attributable to the revenue reporting standards for real estate asset sales. During the year, the company earned consolidated EBITDA margin of ₹ 21.39 Crore against ₹25.76 Crore during the previous year, down 17%, which was largely due to increased power costs and additional marketing expenditures in the Aurangabad mall, required to maintain footfall in a softer retail market.

The idle funds of the company were temporarily invested into liquid mutual funds and interest bearing securities and loans, which has resulted in higher income earning to the company.

Cautionary Statement

This report contains forward-looking statements based on certain assumptions and expectations of future events.
