

Clove Bud

SYZYGIUM AROMATICUM

Clove is the Latin word, Clavus, meaning “nail” because of the shaft of the bud resembling a nail. Clove Bud finds its origin in the Maluku Islands. The slender evergreen trees reach heights up to 36 feet. The gray barked tree has shiny dark green elliptical-shaped fragrant leaves. This tropical spice is excellent digestive oil and has been especially helpful with toothaches. Clove Bud aids in helping to provide emotional support and also makes a great energy booster. It is used in many dental products to help with pain, neutralize bad breath, and kills bacteria in the mouth.

COUNTRY OF ORIGIN

Zanzibar, Madagascar

EXTRACTION METHOD

Steam Distillation

PLANT PART

Flower, Leaves

BOTANICAL FAMILY

Myrtaceae

CHEMICAL FAMILY

Sesquiterpenes, Phenols

AROMA

Spicy, Sweet, Warm, and Radiant

NOTE

Top-Middle

SAFETY

- Non-toxic
- It is a hot oil and may cause skin and mucous irritation or sensitization.
- Clove Bud can act as a blood thinner so precautions must be taken if taking prescription blood thinners.

Non-toxic. Dilute well before use; for external use only. May cause skin irritation in some individuals; a skin test is recommended prior to use. Contact with eyes should be avoided.

THERAPEUTIC PROPERTIES

The high sesquiterpene content contributes to the anti-inflammatory and pain-relieving effects of Clove Bud. The essential oil derived from clove buds is not as irritating to the skin as the oil taken from the leaf or stem. Eugenol, which causes skin and mucous membrane irritation, is buffered by the sesquiterpenes within Clove Bud.

ANALGESIC	ANTIVIRAL	ANTIMICROBIAL
ANTI-INFLAMMATORY	CARMINATIVE	ANTISEPTIC
ANTIBACTERIAL	RUBIFACIENT	EXPECTORANT
ANTICOAGULANT	WARMING	NERVINE
ANTIFUNGAL	COOLING	REGENERATIVE
ANTIOXIDANT	ANTI-PARASITIC	VERMICIDE
