Allmops Press

The new Allmops Press gets even better

The Allmops press has gained more and more customers using Kentucky or Flat mops in many different materials and styles.

In certain locations, mainly hot countries, we have found extensive use of the Kentucky type of mop with a round topped plastic holder and quite often, these have been broken by being trapped in the pressure plate of the Allmops press. For this type of mop we have developed the new cut out pressure plate which allows these mops to be used without being trapped and with no loss of performance for all types of mops.
